

Earthquake Safety Program

Notification

Start of Construction at San Leandro Station

July 2013

Dear BART Customer:

As part of our systemwide Earthquake Safety Program, we will begin strengthening structures at the San Leandro Station to better withstand future earthquakes. Beginning in **early August 2013** work areas will be fenced in and you may see large equipment accessing the site such as dump trucks, backhoes and lifts. Stage one of construction consists of temporary closures of some fee, permit and disabled parking spaces, with the permit and disabled parking spaces relocated nearby. There will also be a relocation of bicycle electronic lockers. Please see the diagram on the back for parking impacts and bicycle electronic locker relocation. During construction, pedestrian access in and around the station will change periodically. Please proceed around construction areas with caution and watch for signs with safety information and other notices. You can also expect temporary construction-related noise, dust, and traffic impacts. We will monitor noise and dust and work to minimize any inconveniences. We appreciate your patience and cooperation during this work.

Construction Work Details

- **Description:** Constructing temporary enclosures, demolishing concrete structures, adding steel and concrete to foundations, strengthening column caps, limited asbestos and lead-based paint removal (following all protocols), and protecting utilities and equipment
- **Location:** Various areas throughout and around the station, parking lots, platform, stairs and other locations
- **Start Date:** Approximately early August 2013
- **Duration:** Approximately 2 years
- **General Work Hours:** Work can occur between the hours of 7 am and 7 pm, Monday through Saturday, with some night work and emergency work as necessary

Similar work to strengthen Hayward, South Hayward and Fremont stations, will occur between mid 2013 and early 2015. Earthquake Safety Program construction will be underway at various locations throughout the BART system over the next five years, and is expected to be complete by the end of 2018. As always, safety is BART's top priority. Our aim is to strengthen BART as quickly as possible, while maintaining BART service.
