Addendum No. 1 to bid specifications 07-08.028 Sludge Haul 2007-2008

May 13, 2008

The specifications for bid 07-08.028 are hereby amended to allow for the use of either field site scales supplied by the contractor or by a certified off – site scale approved by the project manager prior to use as in the modified paragraph below – note that any “watering down” of the loaded material is still to take place **after** the weighing:

Sludge Removal Strategies (page 3 – paragraph 1) - The contract is to be quoted on a per ton basis. Tonnage ~~will~~ **may** be determined by field-site scales supplied by the contractor; **or by an off-site certified scale approved by the project manager prior to use, with documentation of each load required to be submitted to the project manager.** Dust control shall be the responsibility of the Contractor during the loading and hauling operation. Plant effluent water (No. 3 water) is available for use by the contractor if the contractor wishes to lightly water down the loaded material to assist in dust control. Said practice shall be performed after each load weight has been determined. All trucks shall be tarped.

All other remains the same
